Academic Projects

Project Title: Performance Analysis of Aluminium Thermosyphon at various Inclination.

Abstract: Electronic Devices, Power plants, etc. have losses in form of heat and to increase their efficiency it is essential to liberate heat from them at high rates. A model is being developed to investigate the performance of two phase close thermosyphon. A aluminium thermosyphon of length 350 mm and internal and external diameters of 17.5 mm and 19.5 mm is used for experiment. The thermosyphon charged with acetone with filling ratio of 30% is investigated. The performance analysis was conducted at inclination angles of 30°, 50°, 70° and 90°. And heat input of 50 W to 250 W was given at evaporator section.

Extra/Co-Curricular Activities

- Certification of successfully completing internship at Vehicle Depot, Pune Municipal Corporation for 15 days.
- Volunteer of the college technical event “Nirmaan” at state level.
- Volunteer of the college sport event “Ranaangan” at state level.
- Volunteer of the college car racing event “Zeal drag” at national level.
- GD & T Workshop
